**Paper TITLE:** Research on Knowledge Creation Mechanism of Government in Industry University Research Cooperation Mode

**Author:** Hongyan Zhang, Harbin University of science and technology, Harbin University of science and technology  
Yajing Liu, Haixia Zhang, Harbin University of science and technology

As an important form of Inter Organizational cooperation, industry university research cooperation has always played an important role in national technological innovation and economic development. This paper divides the industry university research cooperation model into government led and non-government led, and expounds the knowledge creation mechanism of these two models with the help of SECI's knowledge creation model. By comparing the different mechanisms of the two models, this paper finds the path of the government in improving the knowledge creation performance of industry university research cooperation.
